

Multifunction plate for surface cleaner

ABSTRACT OF THE DISCLOSURE

The plate is constituted by a plate (1) of a generally rectangular shape, equipped with several means for fixing different types of pieces of textile, the means being on the lower base of the plane portions, in the case of self-gripping strips, and on the upper face (3), in that of clamping mechanisms formed by a specially shaped strip co-operating with a central window (9) and lateral cavities (10).

Application to surface cleaners.
